Textures

Millsawn Texture

Millsawn is our most rustic texture. It creates a uniquely rugged look and feel. We create this texture using lumber directly from the sawmill, with only minimal hand-planing and sanding over the joints and the roughest spots. The sawmarks can be rounded or straight; or a combination of both. Millsawn texture does not provide a flat surface; instead, each piece possesses its own, unique characteristics and feel.

Random Handplaned Texture

Random Handplaned texture adds a uniquely rustic touch to any piece. We create this texture by randomly applying the hand-planer to the wood panel's surface. While mainly used on tops it can be applied to any flat surface.

Windswept Texture

Windswept texture has the distinctive texture of wood exposed to the elements with all the strength of new wood! With this texture we seek to imitate the look of weather-worn barnboards. This texture can be done on any flat surface.

Textures

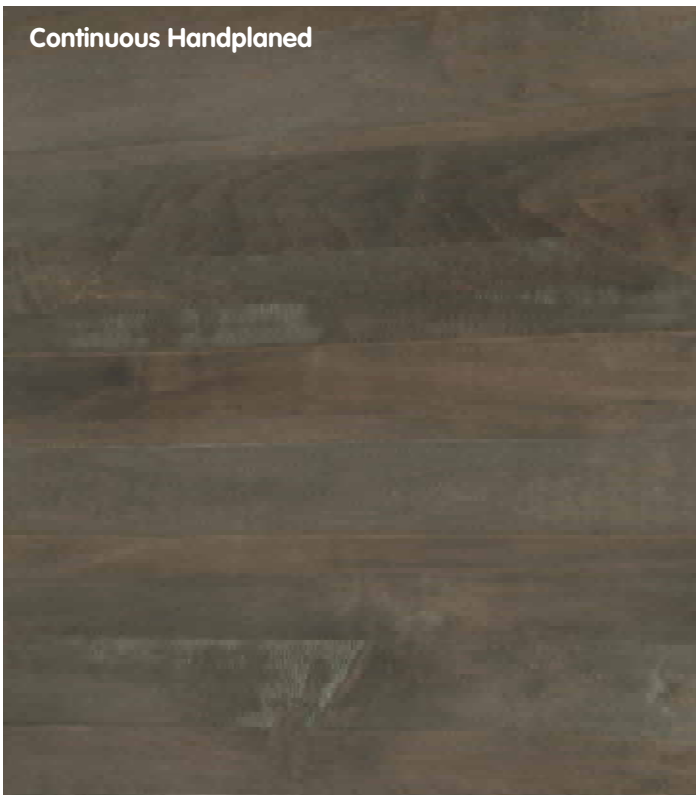

Vintage Texture

Vintage Texture adds a distinctly antique look and feel to new wood. Created with a planer with some over-sanding done, this texture can contain minor nicks and dents. These characteristics are not a defect, but instead make each piece unique.

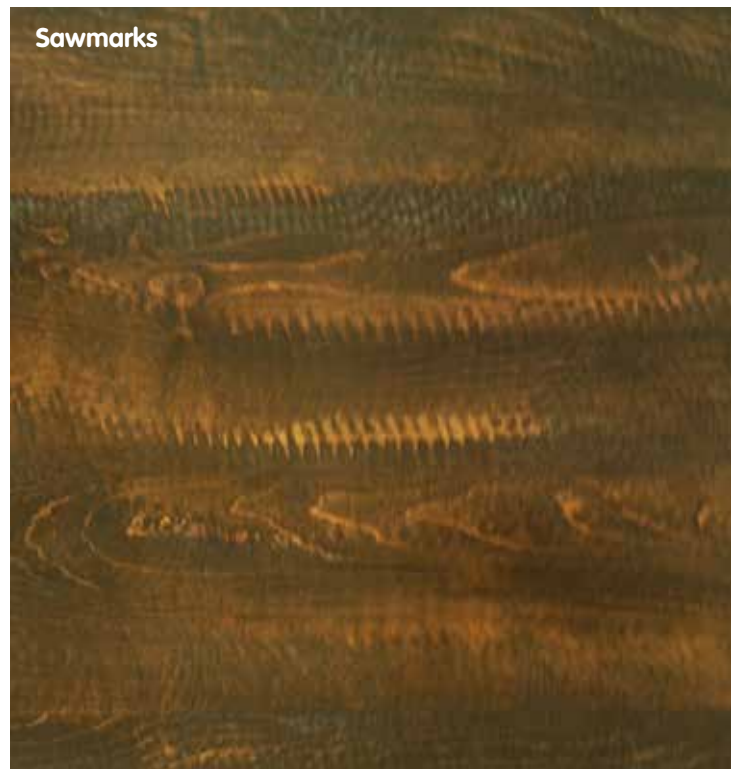

Continuous Handplaned Texture

Continuous Handplaned texture is a hand-planing scrape from one end of the panel to the other in one continuous line. These scrapes are evenly spaced out across the width of the panel (as seen in picture). This creates a raised space between each scrape. This texture can be applied to any flat surface, and is far more consistent than the Random Handplaned texture outlined on the previous page.

Sawmarks Texture

Sawmarks texture still has a rustic feel to it, though it is less rugged than our Millsawn texture. We add the Sawmarks texture to an already evened surface, creating a rippled surface with rustic characteristics. It can be applied to any flat surface.

**The standard texture for each bedroom or dining set is specified on each page.
On most of our products we can customize to the texture of your choice from the list above.**
